1. Introduction

OFFICIAL ZUNO (ZUNO) is a community-driven meme token on the Solana blockchain.

The token has **no mint authority**, **no freeze authority**, and **immutable metadata**, ensuring a trustless and irreversible supply structure.

ZUNO embraces the culture and identity of a decentralized “ZUNO Army” community — focused on transparency, open participation, and meme-powered growth rather than promises of financial return.

ZUNO does **not** represent ownership, revenue rights, or investment guarantees. It is a freely tradable community token within the Solana ecosystem.

2. Token Characteristics

Attribute	Value
Token Standard	SPL
Total Supply	10,000,000,000 ZUNO

Attribute	Value
Mint Authority	Revoked permanently
Freeze Authority	Revoked permanently
Metadata	Immutable
Decimal Precision	9

3. Liquidity & Trading

ZUNO is traded on the Solana ecosystem via **Meteora AMM**, and is fully compatible with **Jupiter Aggregator**, allowing routing across major Solana DEX pools.

Primary Pool:

<https://www.dexscreener.com/solana/7jfWod7G5YTFuhtvtKeKgRWipoMhS2LpSMAS1fVyo6WM>

Liquidity is decentralized and community-accessible.

4. Token Distribution (100% Transparent Allocation)

Allocation	Percentage	Status	Vesting / Notes
Creator & ZunoCo Wallet 1	22.5%	Locked (Streamflow)	24-month linear vesting
Creator & ZunoCo Wallet 2	22.5%	Locked (Streamflow)	24-month linear vesting
Development & Ecosystem	10%	Locked (Streamflow)	12-month linearly vested
Liquidity Reserve Treasury	10%	Locked (Streamflow)	Used for liquidity stabilization
Advertisement & Growth Treasury	10%	Locked (Streamflow)	Campaigns, listings, expansion
Creator & ZunoCo (Strategic Ops)	7.5%	Locked (Streamflow)	Contributor incentives
Staking Rewards Program	7%	Locked (Streamflow)	Protocol-distributed rewards
Public Trading Float	~10%	Unlocked	Market-distributed supply
Service Providers / Audits	0.5%	Locked (Streamflow)	Released monthly over 12 months

Total = 100%

All locked allocations are publicly viewable on Streamflow:

5. Decentralization & Security

- **No admin keys**
- **No upgrade authority**
- **No freezing abilities**
- **No additional minting possible**

This ensures ZUNO cannot be altered, expanded, or force-transferred.

6. Community & Ecosystem Positioning

ZUNO is built for:

- Culture
- Identity
- Recognition within the Solana community

Utility emerges organically through:

- Community growth
- NFT integrations
- Staking incentives
- Social movement narrative

There is **no roadmap that includes financial promises** — value is market-defined.

7. Partnerships & Adoption

- Listed on **CoinGecko**
<https://coingecko.com/en/coins/official-zuno>
 - Verified within **Streamflow ecosystem**
 - Active and expanding holder base
 - Open development coordination on GitHub
-

9. Legal Disclaimer

OFFICIAL ZUNO is **not** a financial product.

It does **not** represent ownership, equity, dividends, revenue sharing, or investment return guarantees.

Participation is voluntary and open to the public.

All ZUNO tokens circulate freely in open markets.
